

## VASTU PURUSH

### : NOTICE :

You can make changes in household items and get rid of some problems. But, if there is some Vastu fault in your building, do not make changes on your own. Instead, get some expert Vastu Shashtri and under his instructions do whatever is to be done. Otherwise, negative energy can cause harm to you.

## Shri Rajendra Soni 'shri DADA'

Shri Rajendra Jayantilal Soni is well-known by the name of 'SHRI DADA'. He is dedicated to give selfless service to those who have suffered hardships in life; he has solved their problems. It is his avowed aim to work for the good of mankind and he is devoted in his life to whatever guidance God gives him. A large number of people who have come in contact with 'SHRI DADA' have been rescued by him from their troubles through spiritual as well as practical methods.

His ever alert and impressive personality, his highly knowledgeable discourses and his purely helpful guidance has brought rays of hope in the lives of many depressed persons.

He has the admirable capacity of solving various types of problems arising in the lives of people who belong to different religions. Whether it is a question of spiritual guidance, or of Vastu fault, or some problem connected with mind or body, 'SHRI DADA' does his best maintaining his vow of selfless service to bring about the right solution.

High guidance does not just make a person's daily life happy, it also directs one's self towards spiritual enlightenment.

Indian culture is now being recognized all over the world. The need for understanding Astrology, Vastu Shastra and Spirituality is ever increasing. Among all these one of the major needs of today is correction of faults in Vastu of buildings without demolition or reconstruction.

Vastu Shastra (vastusastra, also Vastu Veda, "science of construction", "architecture") is a traditional Hindu system of design based on directional alignments. The rules of Vastu are based on scientific principles. In Vastu, the meaning of the word 'VAS' is residence and of 'NIVAS' is to live whereas the meaning of the word 'Tu' is eternal lord, the God. Vastu Shastra unifies the science, art, astronomy and astrology, it can also be said as an ancient mystic science for designing and building. Vastu Shastra helps us to make our lives better and will secure from things going wrong. Vastu is a part of Vedas, which are believed to be four to five thousand years old. The art of Vastu originates in the Stapatya Veda, a part of the Atharva Veda.

According to Vastu Shastra, the world comprises of five basic elements known as the pancha maha bhoota. Out of the nine planets, earth has life because of the presence and balance of these five elements. The five elements are Earth, Fire, Water, Air, Sky (Space). Vastu shastra tells you whether a building, a residence or a premises is properly constructed or not? Whether there is a fault in it? It inspects right from the land to other requirements, such as, water, roadways, atmosphere and other dangers around. Today, Vastu can help everyone lead a more balanced life of contentment and bliss. Even if you are not building a new home or office, you can apply some of the Vastu's principles in any existing home or office for improvement. The most important thing to do is start...

Vastu works on the premise that the earth is a living organism, out of which other living organisms emerge. This life energy is known as *Vaastu Purush*. The Vaastu Shastra works for a bounded premise i.e., a house, building, industrial area or shop. The main aim is to form a balance between the outside atmosphere and the atmosphere within the premise. For the

study of Vastu it is necessary to understand the Vastu Purush. If a human body sleeps with its face, belly, navel, sexual parts towards the soil, then examining its various limbs is in itself the study of Vastu Shastra. So, we call Vastu Shastra as connected with physical science, mathematics, sculpture, architecture, engineering etc.

If a building is constructed as per the rules of Vastu Shastra, then in every walk of life one makes progress and earns wealth. By following the basic principles, in every building you get mental peace, happiness, satisfaction, knowledge, health and good fortune.

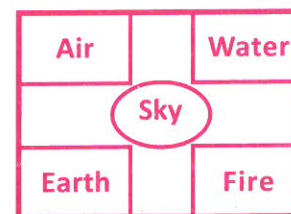

**THE BIRTH OF VASTU PURUSH** Vastu purush is a concept of Indian vastu shastra which is very very powerful and appealing too. According to Matysa Puran, ( sacred scriptures of Hinduism ) when Lord Shiva was fighting a war with asuras, a weird personality was created from a drop of his sweat. He was cruel, horrifying and devoured everything on his way. Terrified Deities went to Lord Shiva and prayed for protection. Lord Shiva pressed the weird man under his foot till the war was over. The weird man surrendered himself to Lord Shiva and begged for his forgiveness. Lord Shiva named him as Vastu Purush and called son of lord Vishwakarma, later the lord ordered him that he would go on the Earth and give Health, Wealth and Happiness to the people residing there. He blessed him that the occupants there will always worship him. Then 45 Deities including Lord Bramha collectively caught hold of Vastu Purush and threw him on the Earth with the face downwards , head in the North East and his feet in the south west. Each body part of the Vastu Purush was given the name of the Deity who touched it. E.g. Lord Bramha touched the navel of the Vastu Purush so it was given the name of Bramha. So the centre of the house where Vastu Purusha's navel comes is called as "Bramhasthan".

The whole idea of classical Vastu shastra is based on the Vastu Purush. We follow this system which gives us very accurate diagnosis of the problems in that place and therefore we can

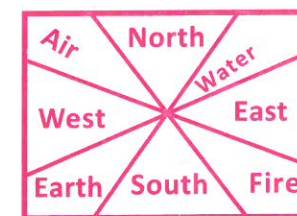

exactly tell the occupant about the happenings in the house. So the cure of the house is very satisfying.

Vastu Purush was born in the month of Falgun of Bhadrapada, date third, day Saturday, constellation Trutiya, yoga Vyatipat, in the midst of Bhadra, Vishtikaran during the auspicious time of Fulik. Hence, he who constructs a house after conducting the worship of Vastu Purush and then enters the house will always get perfect protection.

**VASTU AND PANCHTATVA** The composition of all living beings and also of this world is based on the panch maha bhoota elements. They are : sky, earth, fire, water and air.

Panchtatva (five elements)

Eight Locations

The human body is also made of these five elements. And so, the effective results of these five elements can be seen on human lives. The awakening of any building happens after 21 months  $3\frac{1}{2}$  years, 7 years, 9 or 12 years or 15 years. After these periods either positive or negative energy arises. The energy of the five basic elements have direct effect on beings who live in a house. This is unfailing science which means that here there will be  $1+1=2$ . The rules of Vastu Shastra are not meant for a house only. They affect office, factory, shop etc. hence even these should be based on Vastu. There has to be separate space for cooking, sleeping, sitting, worship, toilet; there has to be an entry gate, a bore-well for drawing water, a compound wall, as well, all these should be as per rules of Vastu.

The energy that arises from the corners of a building also affect a person directly. But when the systems of the house are not as per rules the energy loses direction. Its effects could be either positive or negative and it affects a person directly. There

are problems arising in a everybody's life and 60 or 70 percent of them, whether they are mental or physical, social or economical, they come because of Vastu faults.

There are so many problems which we consider as an outcome of a previous birth or a misfortune. But many of these problems can arise out of Vastu faults. If you can get rid of those faults, you can get rid of the most difficult problems also.

On this earth, the gods, the demons all live together. Humans and demons, both are devotees of Lord Mahadev. So, they are both blessed; however, the demon also needs space to live on this earth. As per the Shastras gods live in buildings which have entry from north-east corner. And demons find their living space in buildings where the entrance is in the direction of the earth element. In Vastu Shastra the stress is more on corners than on directions.

	NORTH			
	North-West Moon Mind, Relations, Court, Travel Abroad	North Mercury Wealth, Progress	North-East Jupiter Water, Weak	
WEST	Saturn Ethics, Store Room, Dining Room	The Sky	East, Sun, Fame, Reputation, Male Reputation, Study Room	EAST
	South-West Rahu, Steadiness, Main Bedroom	God of Death Mars	Fire, Venus, Craft, Wealth, Female Health, Marital Relations, Kitchen	
	SOUTH			

**THE SKY** In our home we can get the advantage of the element Sky by leaving the courtyard open.

**FIRE** Fire is represented by the sun. Sun gives us warmth as well as energy. To get the benefits of the sun rays, we should

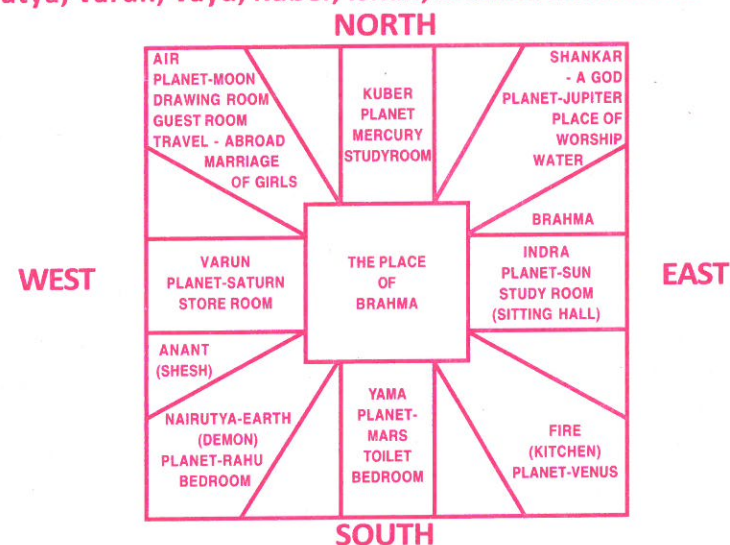

leave open space in east and flooring wit a slope towards east. In front of the building there should be no tall trees as they block sun rays.

**AIR** The air coming in from east contain solar energy. Also, the northern side should be more open. And there has to be more doors and windows. On the southern side there has to be minimum number of doors and windows.

**WATER** To maintain the gravitational contacts watery portions have to be on the north north-east direction. If all your water sources are in this direction, it will be the best.

**EARTH** The earth rotates in southern direction. So, more energy travels southwards. Hence, if the north-east corner is heavy and if the height of south-west corner is lower than the north-east corner, than this creates hindrance to the flow of energy. So it is important to have north-east lower than south west for smooth flow of energy towards south.

**IMPORTANCE OF ALL TEN DIRECTIONS** Along with our universe the eight directions, the sky (antariksh) above and deep inside of earth (pataal) are all under the pressure of energy. All these 10 directions are known by the names of Indra, Agni, Yama, Nairutya, Varun, Vayu, Kuber, Ishan, Brahma and Anant.

**NORTH** This is the direction of Kuber (the, lord of wealth). This corner should not be loaded with heavy weight. In this direction the height of the flooring should not be higher than south-west corner and west direction. The more this corner is empty and light, more will it support in increase of wealth. If this corner gets fouled, the anxiety over some injury to wife or to mother or to child will increase. Better to have mirrors and curtains of white or green color for they would be auspicious.

**ISHAN (NORTH EAST)** The corner between north and east is known as Ishan. Here the planet Jupiter resides. Here there is Water. The head of Vastu Purush is in north-east. Most positive energy is here. In this corner both north and east meet. So, the energies of Indra and Kuber unite and increase wealth, progeny, sons and family lineage. To have water resources in this direction and water flowing out from here are both auspicious. This direction should be fully open and the flooring from all direction should be sloping towards North-East. Mirrors and curtains to be in white color. For meditation and worship this is an auspicious direction.

If a Vastu fault occurs in the north-east corner, it hinders the flow of positive energy. This impacts negatively to the children's education, and the growth of the future generation. If the north-east corner is cut, it straightaway means that the head of the Vastu Purush is cut as a result, unwanted problems will arise. If toilet and bathroom are in north-east corner, then those living in that area may put in labourious hardship but the result will only be about 10 to 20 percent positive not only that the problems will keep increasing. Someone in the house may suffer physical ailment.

If kitchen is in north-east corner, wife's health will not be good. There is bound to be some difficulty with one daughter. And there could be loss of money. Tension will arise. Unexpected expenses may come.

A water tank in the northern side of the north-east corner is considered good. If the water tank is in the eastern side of the north-east corner, one's reputation gets hurt. If the north-east corner is somewhat extended, it is considered auspicious.

**EAST** The lord of east is Indra. This direction should be fully open. It is auspicious to pray facing east direction. Students should study facing this direction to get best results. If the curtains in this direction are yellow they bring good omen.

**AGNI (SOUTH EAST)** The corner between east and south is known as Agni. The planet Venus resides here. Since two directions meet here, so there is more flow of energy here. Our ancient scriptures prescribe that the first stone-laying should always be performed in Agnikona. Keeping your fireplace, machines, kitchen etc. in this direction is good. Curtains here should be of blood-red color.

If in some way the Agnikona happens to be defective, i.e. if the Agnikona is cut or it is extended, it directly affects a woman. Because the woman is born out of Venus. This corner is also connected with economic outcomes. If a bedroom is in this direction it gives positive effect. The water tank and the bore-well should not be in this direction. Neither bathroom, nor toilet should be in this direction else married life could run into troubles. If a water tank or bore-well is in Agnikona it can cause ailments to women. It can also cause delay in any one daughter's wedding.

**SOUTH** The lord of this direction is Yama. He is dark in complexion. And so he is known as the supreme judge. This direction is recognised as that of abundant crop, prosperity and energy. It is beneficent to have your western and southern parts little higher than rest of the building, house, shop etc. So, the mirrors and curtains in this direction have to be of black color they are considered auspicious.

**NAIRUTYA (SOUTH-WEST)** This is a corner where southern and western directions meet. Here resides the planet Rahu and as an element it is known as Earth. Construction in this direction should always be carefully followed as per Vastu. If you honor this direction it protects you from the threats of an enemy. If most of the time is spent here it is considered auspicious. If the bedroom of the family head is in this corner, it is considered most auspicious. If the mirrors and curtains in this direction are of black or dark blue color, it is good.

On the other hand, if any fault happens to be there in the Earth element, such as, a damaged corner, it indicates that there can be instability or some injury to one's leg. But, a damaged corner of Earth can help a person to great deal of progress for some time, however thereafter, it will throw the same person from top with sharp downfall. If a corner of the element Earth is damaged, it generally indicates a life full of struggles.

If a water tank is underground or overground or there is a borewell in south-west, then it is indicator of death. It also means that a person does not live life, but drags it somehow. In the Earth element there is great power. So, it is stable.

In the rooms connected with the Earth element whichever person sleeps, he gets commanding power. That is why the bedroom of the head of the family here is considered auspicious.

If the Earth element is faulty, every type of struggle has to be faced. If the main gate of a house is in south-west, it leads to conflicts, instability, the hard work does not result to any benefit.

If a Kitchen is in Earth element, then the lady of the house will dominate. If children room is there, then the children will rule. If any fault is found in Earth element, such as, its elevation, having a basement, having a water tank, the corner either raised or shortened, then whether it is a residential house, an office or a factory, the owner of the place has to face hard struggles. This can even give rise to court proceedings.

**WEST** It is the direction of the lord Varun. Hence, there will be soft activities, flexible temperament. So, this side influences behavior pattern the most. The sun sets in this direction so, the flooring of this should be elevated. Doors and windows should be less in this direction. White colored mirrors and curtains will be auspicious.

**VAYAVYA (NORTH-WEST)** In this direction the corners of north and west both meet. The planet Moon resides here. The controller of this direction is Air. If it is faulty, even friends turn

into enemies. This portion should be higher than the north-east corner. Mirrors and curtains in this direction should be green in color.

Since the Moon stays in north-west corner there is no stability here. Moon is connected with mind and mother. Whenever the Air corner is faulty, the mind of the person residing here will be unsteady. He will not be able to take any decision. It also isolates a person. His relation with his mother will be spoiled. Even his social contacts will run into difficulties.

The guest room could be kept in north-west corner. If one sleeps in a room in north-west corner the possibility of his travel abroad will be speedy. If a girl of marriageable age sleeps in a room situated in the north-west corner, the chances of her getting a good spouse increases.

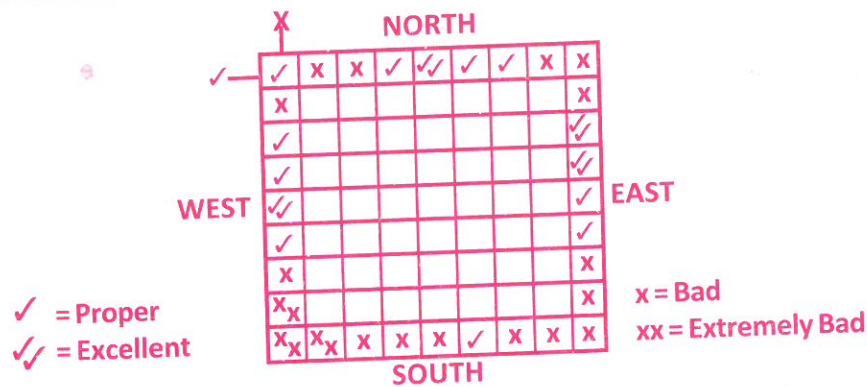

When the north-west corner becomes faulty the number of one's enemies will increase, litigation will go up. And suspicions over each other in a family will increase.

**THE SKY (BRAHMA)** It is believed to be in the middle of the east and the north-east. Brahma is the creator of the universe. So this must have very clean space where worship, meditation etc. can be performed. Moreover, this is the place where the dynasty next generation grows. Mirrors and curtains to be of olive-green color.

**PATAL (THE ENDLESS)** This direction is believed to be between west & south-west. The earth is balanced on this side, so if there is heavy weight here it's good. Having a door in this corner is wrong.

**WHERE TO HAVE THE MAIN DOOR OR THE MAIN GATE** One has to pay special attention to the main door; it is the soul of the house. In a building the importance of the gate is like the importance of the face in a human being. As per Vastu Shastra, measure the total length of the direction in which there is your main gate and divide it in nine equal portions.

**MAIN GATE** If the main gate is in north, then in the north east corner leave two portions and in the north-west corner leave two portions and in the remaining five portions you can construct your main gate.

In the west leaving two portions in north-west and three portions in south-west the remaining four portions can be utilised for constructing the main gate.

To have the main gate in south is not considered good. If by circumstance one is compelled to construct the main gate in south, then only one portion is believed to be enough. You leave, five portions in south-west and three portions in south-east and in the remaining one step you can construct your main gate.

**IN WHICH SIDE SHOULD THE GATE OPEN** when you open the door from inside, it should go toward left. It means that if you are standing outside the gate should go towards your right and toward the inside wall. Never have a gate opening outward, whether it is a house or a shop. Nowadays to make the main gate look attractive people construct gates with designs. But as per Vastu Shastra, the main gate should be plain and thick. A smooth gate symbolizes peaceful and happy living. A gate with designs can bring ups and downs and struggles in life. If there are doors of glass or transparent doors, they are considered as symbolizing the transparency of the house.

If the main gate is transparent secret matters can be known to neighbors. Matters to be kept in the house float outside. The width of the main gate should be wide. And the width of other gates in the

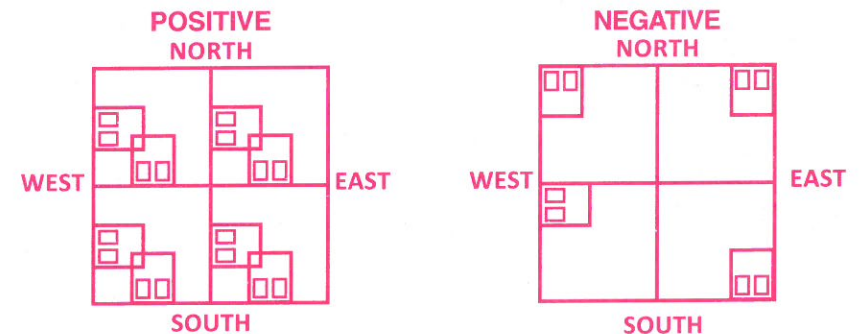

house should be lesser than that of the main gate. In that case the discipline between income and spending is maintained.

On the main gate there could be auspicious symbols, such as, Swastik, Jingle Bells, a conch, the word Om, garlands, Ganpati, a lamp etc. Main gate should be one foot higher than average human height. There need not be any hindrance while entering. On the inside of the gate, as well as, on its outside of the gate make a small seat and place a Ganesh idol there. You can have a door in North, East and West in the order of auspiciousness. Having door in south is not so auspicious.

### : INTERNAL LAYOUT OF A HOUSE :

**DRAWING ROOM** There should not be many corners in a drawing room. Make it square, rectangular or round shaped. Sitting arrangement should not be under any beam. Do not sit with either your face or your back toward the doors or windows. Keep only that much furniture as is necessary. Do not keep sofa or table in front of the door.

**BEDROOM** Between a person and the energy gained in his bedroom there is special relationship. About one-third portion of our life we spend there. Your bed should not be close to the door. Do not sleep with your legs pointing towards the door. Keep a curtain between the door and your bed. The mirror should not be exactly opposite the bed. Keeping TV or computer in the bedroom is also not good. One or two hours before you go to sleep put off your TV, Computer etc. Decorate your bedroom with beautiful paintings, flowerpots, little toys made of glass, wood or earth. But, do not put any frightful pictures or negative scenes in the bedroom.

A person sleeping in a bed kept in north-east corner is always troubled by the fear of events which are not going to happen. Whoever comes in contact with this person may do good to others, but not to himself. If a senior citizen of the family sleeps in the north-east corner he is benefited. His age increases and he can be more spiritual.

The corner between east and south is beneficial for married people. Ladies and unmarried girls, if they sleep in a south-eastern room the outcome is good. And if a pregnant woman sleeps in a south-eastern room touching the wall in either east or south, the possibility of her having a premature child increases.

People who sleep in the corner between west and north are usually out of their home more often. If a guest room is constructed in this corner, Vayavya, it is much better.

If the position of the bed is in the south-west corner, it gives more strength than needed. If one sleeps in a room so positioned, one's head should be toward south or west. The bed should be open on three sides. Never sleep in the centre of the room. It is inauspicious.

**KITCHEN** A kitchen is like a treasure house for the housewife, as well as, for the whole family. The kitchen should be in south-east corner toward the eastern side. Such a positioning would make persons working there comfortable and cheerful. They will be able to prepare high quality food. Water, sink and fridge need not be very close to fire. In fact, water and fire are two contradictory elements. If anything like that happens, a person's reputation, wealth and prosperity declines. The housewife's health also deteriorates.

**DINING ROOM** As per Indian Vastu Shastra, a dining room is considered auspicious if it is in west. It should be close to the kitchen. But not close to the main gate. Neither the toilet nor any dressing room be near dining room or dining table.

**ROOM FOR WORSHIP** The best location for a room for worship is north-east corner. At the time of worshipping a person's eyes should be towards east or north. A temple with worshiper facing east is considered best.

**STUDY ROOM** At the time of studying kids in the family should keep their face toward east. Study room in north-east corner of the house is considered ideal. That raises the memory of a student. Before starting his studies one should recite the sloka given below :

सदा भवानी दाहिनी सन्मुख वसे गणेश पंच ।

देव रक्षा करो ब्रह्मा, विष्णु, महेश ।

**BATHROOM AND TOILET :** Since water flows out of both toilet and bathroom in the house, do not construct any in south-east corner. Then it will cause loss of money. It is inauspicious to have toilet-bathroom right opposite entrance gate. Neither bathroom nor toilet should be in north-east or in south-west corner. The best direction for bathroom is north, whereas for toilet it is either south or west. Never have toilet in the middle of a building. Usually, the seat in bathroom should be in south-west corner, geyser to be in south-east, bath tub and tap in north-east direction. He/she who sits should have face in north-east.

**WATER TANK** Erect water tank in north-east.

**SERVANT** The problem of servants leaving untimely is persistent. So in your interest you grow flowers in metal container either on terrace or on a small part of soil. Servant's quarter should be built in north-east or south-west side for its long stay.

**HEALTH** If you want to stay healthy, in the morning open all windows that are in north, north-east and east, so that sun's rays will bring new energy and enthusiasm in your life.

**TULSI** In the north-east of any building or on a small part of soil grow the sacred plant of Tulsi. It will have good effect on your health.

**MIRROR** In any room the mirror should be hung on a wall in east or north direction. Do not hang a mirror either in south or west. If ever it be necessary, then at night cover it with a piece of cloth.

**MARRIED LIFE** The room in north-east is not ideal from the point of view of married life. It creates conflicts in husband-wife relations and even leads to divorce.

**BEDROOM** If somehow the bedroom is in south-east corner, then in that direction of the bedroom put a flower pot of red flowers. On the northern wall hang a round shaped wall clock. By these steps one's bedroom will keep the inmates healthy. If the bedroom of a house is in southern or western corner, it is considered particularly auspicious.

**OUTFLOW OF WATER** Outflow of water has to be arranged from northern and eastern directions. For one's health and business it is better.

**EASTERN SIDE CLOSED** For some reason if the eastern side is closed, put extra windows on the northern side. On the eastern wall hang a picture of the Sun, a good painting or some natural scenery.

**EATING** Do not eat sitting in your bedroom. Eat either in the kitchen or in dining room. At the time of eating keep your face either toward east or north or west. But not toward south. It becomes the cause for conflict.

**PARKING THE VEHICLE** At the time of parking keep your vehicle in north-west corner with its front toward north or east. This sort of arrangement always brings happiness and prosperity.

**CLEANING OF THE ROOM** Before one starts cleaning the room, one should rub the floor with a piece of cloth soaked in salt water. It destroys all negative energy and increases positive energy. Do not keep broom, dustbin and other such items in the direction where east and north meet. But you can put them in west.

### TROUBLES THAT CAN ARISE BECAUSE OF FAULTS IN VASTU

- ❖ Having a water tank or a bore-well in south-east means getting woman's disease for sure.
- ❖ Where there is a staircase going anti-clockwise, in that house some person will have arthritic pain in the knees.
- ❖ Having entrance gate in south-east corner indicates some incurable disease in the family.

- ❖ If one sleeps with his head toward north he suffers from low blood pressure.
- ❖ If the staircase is in the middle of the house it brings heart trouble.
- ❖ If the south-west corner is in damaged condition, due to some accident one gets injury below knees in his legs.
- ❖ If bathroom and toilet are in north-east corner any one person in the house will have some disease.
- ❖ If any door in a house rubs against the floor, then someone in the family can have skin disease. Or if any flooring in one's house has ups and downs like steps or incorrect slopping then either skin disease or some trouble needing surgery can arise.
- ❖ If the north-east corner is damaged and along with it there are other Vastu faults, the possibility arises that someone in the house will be struck with paralysis.
- ❖ If some heavy weight comes in the Brahma position, it leads to the ailment of ulcer-acidity.
- ❖ If a fault is in east-west and south and along with it there are other faults, it can indicate some disease in kidney or in parts below the waist.
- ❖ If in the element of earth there is a water tank someone can have pain in his legs. Or his struggles in every walk of life increase.
- ❖ If a bed is placed in south-east corner touching both walls, in south and in east, then relation between husband-wife gets impaired. If a pregnant woman sleeps there, she can have premature delivery.
- ❖ If south-east corner is damaged and there is entry door on this side, then tension increases in the house and the woman's health deteriorates. Conflicts arise even over minor matters.
- ❖ To have kitchen and a window in north-east corner creates tensions and diseases arising out of it.
- ❖ In north, in north-east and north-west corners, the more light and open spaces one has, the more prosperity and happiness he will get.
- ❖ If for heavy goods of a house, canteen and godown etc. have to be constructed, then move from south-west corner to south.

## VASTU UDAY VASTU TIPS

- ❖ Guest house can be built in north or west.
- ❖ In constructing a building use more wood and iron.
- ❖ In decorating a house do not put any idol or picture which is frightening or which create in the mind feelings of hatred, anger or surprise. Pictures of wild beasts, war, violence or of back-breaking labour.
- ❖ A wall clock should be on northern or eastern wall.
- ❖ Keep all the four corners of a house clean and empty, so that one can easily get positive energy.
- ❖ Do not collect in your house unnecessary things and scrap which become hindrance to progress in life.
- ❖ When colouring the house pay special attention to colours you use. Auspicious colours are said to be yellow, white, light pink, green, etc.
- ❖ For the outflow of water there can be channels dug in north or in the middle of north-west.
- ❖ On the main gate there has to be a seat for a door-keeper or a gun holding security guard, but his sitting place should be inside the building, however it would not be a hindrance to any person's entry.
- ❖ Once the construction of the building is over one should perform a 'havan' and also, entering the house ceremony, and on the occasion invite all well-wishers, family members, relatives, etc. give a party, and get everybody's blessings. The labourers, mistries and contractors should be properly rewarded and their good wishes to be taken. If during construction there happened any mishap, any mistake or clash, then one should express regrets & give in charity as much as one can.
- ❖ So far possible, sun's rays should fall directly on plants, shrubs etc. in and around the house.
- ❖ Before buying property or building, one should necessarily consult a person who is knowledgeable and acquainted with that area and get his approval. One should not buy a property in a troubled area. Or in localities, regions and places which are hotbeds of criminal activities.
- ❖ There should be no boundary wall in front of the main gate.
- ❖ The generator, transformer or electric meter should always be in south-east corner.
- ❖ Cowshed, car parking to be in north-west corner.
- ❖ Be more attentive toward the north-east corner because there lies the head of Vastu Purush and also a place for worship.
- ❖ That soil is auspicious in which grows wheat, rice and other crops, also vegetables. That soil is the best in which grows mangoes, papaya, guava, amla, pomegranate etc.
- ❖ Whether in an old home or in a new one, if some changes and repairs are carried out, then it is necessary to perform Vastu Puja after it is all over.

सम्पूर्ण सृष्टि की ऊर्जा : सूर्य
